

I just wanted to let you know that strongly oppose Oppose HR 4026 and that its a complete joke to have to wait for the "public" radio stations to give out traffic and weather information at thier discretion. Why don't they quit playing so many stupid commericals and offer more updates?

I drive in the Washington DC area everyday (which has the second worst traffic congestion in the US) and XM makes my commute during rush hours less of a hassle because I can avoid traffic accidents and lane closures. Public Radio stations only play maybe 30 seconds of a traffic report and usually they are never on a road that I'm traveling.

You can be sure that I will be contacting my senators and telling them NOT TO SUPPORT this bill being presented by an industry that has gotten a "swelled head" by thinking they are the only offering out there. It smacks of being protectionistic and a monopoly.

Thank You.
